June 7-9, 2010

Attendees/5/2009/PCB

Subject: Sixth announcement (review status, final paper submission)

December 31, 2009

Dear author:

Before anything, the organizing committee hopes you had a happy holydays together with your families and wish you a successful new year 2010.

With the exception of about 20% of the papers that need a second review the evaluation process is practically finished and we expect that most of you already received the acceptance letters. If you still do not have your acceptance letter and your paper is not under a second review, please, let me know during the next week.

We wish to thank everyone for their help to successfully finish this process on time; specially the reviewers that despite their family's end of year commitments dedicated valuable time to finish their evaluation.

Now, we need to remind you about the final versions based on the publisher requirements. All papers should be delivered in electronic form (MsWord or LaTeX required), as well as identical hardcopy. According to the editorial guidelines, the camera-ready copy of the complete paper printed on a high resolution printer on one side of the paper as well as two copies of the paper should be sent to the address below. Include the original photographs. Check whether the paper looks the same as the sample: Title at top of first page in 16 points, all other text in 11 points on 12 points line space, except for the small text (10 point on 11 point line space) used for the affiliations of the authors, and in tables, captions and references. Also check if the type width is 150 mm and the page length is 240 mm. Write your name and the short title of the paper in pencil in the bottom margin of each page and number the pages correctly. Please see to it that your paper has the same typography as the specimen paper enclosed, whether you used the Balkema templates or not. The publisher will reduce your paper to 85% and print it in black. For this reason please check that the print is clear and of a high quality. It is also very important that you submit your artwork/figures both embedded into Microsoft-Word as in a separate single file, with a preferred format of .TIFF or .EPS. Also include the Consent to Publish form properly signed. No paper will be published without this form.

This material must be with us by February 15th, 2010. Any material received too late will not be published. Send the material by airmail or by courier well packed and in time. Be sure that all pages are included in the parcel.

In addition to the camera-ready final version of your complete paper, you must send us (consec10.finalpapersubmission@gmail.com) an electronic copy in both: Microsoft-Word and Adobe formats, by e mail.
